Art Unit: 1745

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added phrase output controlling means operates and stops the power generating means "according to a consumption of power due to the load" does not appear to have support in the original disclosure, and would constitute new matter. If applicants wish to keep this recitation in claim 1, they are requested to show where it is supported in the original disclosure.

Claims 16-33 are allowed. Claims 16-31 are allowed for reasons pointed out by applicants. It is noted that Bonnefoy teaches that his fuel cell may be interrupted "in case the voltage at the batteries terminals is too high or too weak" (column 4, lines 6-7 of US '874), but this does not indicate whether this is the voltage supplied by the fuel cell or that produced by the battery, or whether this is related to the charging of the battery, which occurs when the load demand is at a low value (column 2, lines 58-60). Claims 32 and 33 are correspond to original claims 5 and 24, previously objected to while containing allowable subject matter.

Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection. Applicants have pointed out how Ohara *et al.* do not disclose a control means which stops the operation of their fuel cell. The references submitted with the IDS of 12/19/03 have been reviewed, and are not found to disclose the subject matter of the present claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
